coating line

## Oven-air cooling

## Coating line

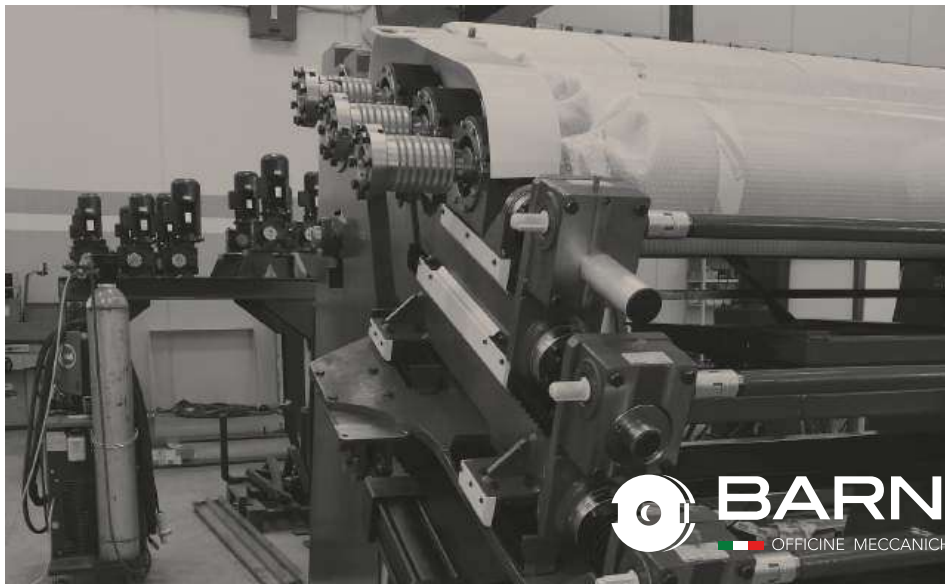

A detailed 3D architectural rendering of a large-scale industrial coating line. The facility is a long, multi-story structure with a complex network of steel beams, walkways, and platforms. It features numerous large storage tanks, pipes, and mechanical components. The design is highly technical and industrial, showing the intricate layout of the manufacturing process. The rendering is presented in a perspective view, highlighting the scale and complexity of the infrastructure.

# Image

A photograph of a large industrial machine, likely a paper mill, showing a long, continuous roll of material being processed. The machine features large, polished metal rollers and a complex system of pipes and structural supports. The material being processed appears to be a thick, white, fibrous substance, possibly paper or a textile. The background shows a large, industrial building with a corrugated metal roof.

# Coater

A large industrial machine, likely a roller coater, is shown in a factory setting. The machine has multiple rollers and a large cylindrical component. The BARNI logo and text "OFFICINE MECCANICHE" are visible in the bottom right corner.
